# BODY-JET For a more defined, youthful body contour

## THE GENTLE POWER OF BODY-JET

Water-jet assisted liposuction gently introduces an irrigation solution into targeted fatty areas with a pulsating spray action. The gentle water-jet loosens the fat cells, which can be suctioned off immediately.

With Jet assisted fat transfer (JAFT), your own soft viable fat cells can be re-used to augment areas that may have hollowed with age, such as your brows, hands, and nasolabial folds to give a more natural, youthful look. This method can also be used to create fuller breasts, rounder buttocks and even fill out acne scars.

## IS THE TREATMENT PAINFUL?

A local anaesthetic is continually applied, so there is little discomfort during the procedure. There is significantly less swelling than with alternative liposuction methods, allowing the surgeon to be more precise and assess results throughout the process. This allows for quicker recovery from a less invasive, more highly targeted method of liposuction.

## ARE THERE ANY SIDE EFFECTS?

Body-jet and jet assisted fat transfer are far gentler methods of removing and re-introducing fat cells than more traditional alternative treatments, so there is less likelihood of damage to surrounding cells, and nerve tissues under the skin. The treatment is precision targeted, causing less discomfort during the treatment and improving recovery times.

Before

After

## HOW LONG DOES IT TAKE?

The Body-Jet procedure takes approximately one hour per area, and results are almost instant. And if you've chosen jet assisted fat transfer, the fat that has been removed is ready to be transferred instantly.

## WHAT AREAS OF THE BODY CAN BE TREATED?

Body-jet is suitable for the abdomen, buttocks, thighs, stomach, knees and upper arms plus other areas where excess fat exists. Jet assisted fat transfer can help the 'hollowed out' areas of the eyes or cheeks, your brows, laugh lines, your hands, and even your breasts or buttocks.

## IN SAFE HANDS

The treatment is performed by one of our qualified cosmetic practitioners, who will be supported by a team of highly trained professionals dedicated to providing the best possible care before, during and after your treatment.

Call us today on 01225 700072 to arrange an initial no-obligation consultation.
