

A close-up, profile view of a woman's face, looking upwards and to the right. Her skin is smooth and fair. She has dark, well-defined eyebrows, long dark eyelashes, and brown eyes. Her lips are full and have a natural pinkish hue. A large, vibrant pink lily flower is positioned in the lower-left corner, partially obscuring her chin and neck. The background is a plain, bright white.

COSMETIC RADIO SURGERY

Achieve beautiful, smooth skin by removing moles and skin lesions painlessly, with minimal scarring. Choose cosmetic radio surgery at Snowberry Lane Clinic.

SNOWBERRY LANE
CLINIC

HOW DOES THE TREATMENT WORK?

Cosmetic radio surgery is a revolutionary procedure which uses the latest technology to remove moles and skin lesions without the need for cuts or stitches.

Before

After

Results from this treatment are superior to more conventional and invasive methods of lesion removal. However, some moles may reappear so a repeat procedure may be required at a later date. You will be able to view illustrated examples of previous results during your initial consultation.

IS IT PAINFUL?

The needles used in the procedure are very fine to minimise any discomfort and ensure the injection is as painless as possible.

HOW LONG WILL IT TAKE?

Cosmetic radio surgery can be completed in 15-20 minutes, so you can even slot it into your lunch break!

IN SAFE HANDS

The treatment is performed by one of our qualified cosmetic physicians, who will be supported by a team of highly trained professionals dedicated to providing the best possible care before, during and after your treatment.

As with all procedures carried out at Snowberry Lane Clinic, clients receive an initial consultation to discuss the treatment in detail. The procedure itself is extremely safe, however we do take a full medical history prior to the treatment to ensure any risk is minimised.

There are no waiting lists for this procedure, which means that appointments are readily available.

So what are you waiting for? Talk to us now and find out how cosmetic radio surgery can help transform your skin!
