

# PHOTO REJUVENATION

Say goodbye to wrinkles and achieve a fresher, brighter, more radiant look with a range of laser treatments available at Snowberry Lane Clinic.

## WHAT IS COSMETIC LASER SURGERY?

Cosmetic laser surgery is a non-invasive technique for treatment of skin conditions.

A hand held laser is passed over the area of skin to be treated,

generating heat energy to alter the appearance of the skin. It is suitable for all types and colours of skin and is a safe and effective procedure.

Before

After

There are minimal risks to health and patients can expect to resume normal activities immediately following completion of most treatments. It is safe and effective with often staggering results.

## WHAT TREATMENTS ARE AVAILABLE?

Photo rejuvenation – Say goodbye to fine wrinkles! Laser treatments can reverse the signs of ageing and sun damage on the hands, face, neck and chest. Lines are minimised by tightening of the skin and the size of pores are reduced. Results are a fresher, brighter and more toned skin, giving you a new, more radiant look. Skin blemishes, freckles and age spots can also be effectively treated.

## IN SAFE HANDS

The treatment is performed by one of our qualified cosmetic nurses, who will be supported by a team of highly trained professionals dedicated to providing the best possible care before, during and after your treatment.

As with all procedures carried out at Snowberry Lane Clinic, clients receive an initial consultation to discuss the treatment in detail. The procedure itself is extremely safe, however we do take a full medical history prior to the treatment to ensure any risk is minimised.

So what are you waiting for? Talk to us now and find out how cosmetic laser surgery can help you achieve younger looking, fresher skin.
